AI Engineer for Developers
Associate

Kyle Springfield

Business Intelligence Manager
Raleigh, North Carolina, United States

Summary

I build Snowflake-backed data systems, custom dashboards, and AI-assisted applications. My work combines Python automation, data modeling, app development, and agent orchestration to turn messy business workflows into reliable tools. I focus on practical systems: clean data foundations, automated reporting logic, custom dashboards, AI-powered interfaces, and agents that reduce the repetitive drag between question, code, data, and action. Outside work, I build AI products and experiments across business-data chat, content automation, interview prep, and multi-agent workflows.

Experience

Cisco
Business Intelligence Manager
June 2026 - Present (1 month)
Cary, NC

- Partner with sales operations leaders, program owners, and cross-functional stakeholders to translate complex business needs into governed datasets, executive-ready reporting, and actionable dashboards that support operational visibility and business decision-making.
- Design, build, and maintain Tableau dashboards, GitHub Pages reporting surfaces, and Snowflake/dbt data models that integrate multiple data sources and improve visibility into program performance, survey insights, content governance, and sales operations trends.
- Leverage Cursor and AI-assisted development workflows to accelerate analytics delivery, automate recurring reporting logic, strengthen data validation, and prototype scalable processes that improve reporting consistency, documentation, and stakeholder responsiveness.

TEKsystems
Business Analyst
October 2025 - June 2026 (9 months)

Raleigh, NC

- Partner with sales leadership to translate business needs into governed datasets and decision-ready reporting, developing Tableau dashboards and Streamlit applications that support go-to-market strategy, pipeline visibility, and performance measurement.

Peraton

Data Engineer

September 2024 - October 2025 (1 year 2 months)

Raleigh, North Carolina, United States

- Delivered high-quality, efficient data solutions to support CMS in detecting and preventing fraud, waste, and abuse within government-sponsored health programs.
- Streamlined version control and collaboration by implementing Git and GitHub, improving the reliability and traceability of code changes.
- Utilized AWS services to architect and maintain cloud-based data solutions, incorporating complex SQL queries and robust data models.

Freelance

Python Developer

September 2021 - September 2024 (3 years 1 month)

Raleigh, North Carolina, United States

- Created and optimized data pipelines and workflows, leveraging Python, SQL, React and AWS to deliver actionable business insights for various clients.
- Integrated LLM APIs into various applications, enhancing functionalities with advanced natural language processing and generative AI capabilities.
- Mastered data manipulation in Python and utilized React and Tableau for dynamic data visualization projects, effectively transforming complex datasets into intuitive graphical representations for client decision-making support.

RR Donnelley

3 years 11 months

Data Engineer

July 2021 - September 2021 (3 months)

Morrisville, North Carolina, United States

- Enhanced the efficiency and accuracy of our predictive models by optimizing marketing science Python modules, while leveraging Git for seamless version control and team-wide code integration.
- Implemented automation processes that reduced manual intervention and increased overall productivity in campaign analysis and reporting.

Senior Data Scientist

February 2020 - July 2021 (1 year 6 months)

Morrisville, North Carolina

- Developed Python scripts for automation and data models within Jupyter Notebooks, streamlining digital campaign measurement workflows to significantly enhance operational efficiency.
- Applied machine learning to build campaign insights using custom regression models in Python and SQL, enhancing predictive analytics and campaign performance evaluations.

Marketing Data Scientist

June 2018 - February 2020 (1 year 9 months)

Morrisville, North Carolina, United States

- Spearheaded the development of self-service automation by creating Python scripts integrated with Jira to streamline processes, resulting in significant enhancements in efficiency and task management.
- Developed tailored Tableau dashboards for top clients, managing complex data sources to deliver detailed insights that supported strategic decision-making.

Data Analyst

November 2017 - June 2018 (8 months)

Morrisville, North Carolina, United States

- Transformed post-campaign data into actionable insights using Python, SQL and Tableau, enabling enhanced strategic decisions and better client outcomes.
- Developed advanced analytical tools in Python, which significantly improved data visualization capabilities and facilitated a deeper understanding of market trends.

UBS

Risk & Performance Analytics Specialist
November 2016 - November 2017 (1 year 1 month)
Raleigh, North Carolina, United States

- Designed and implemented comprehensive risk and performance dashboards in Tableau, reducing report generation time by over 50% for senior management.
- Collaborated with global teams to standardize and automate reporting processes using Business Objects and VBA, ensuring consistent and reliable data delivery.

NetApp
Data Analyst
May 2016 - November 2016 (7 months)
Raleigh, North Carolina, United States

- Collaborate with Support Account Managers and sales teams on top enterprise customer accounts to provide accurate and timely customer-facing reports.
- Create custom-built Oracle BI reports and dashboards to extract data, analyze results using statistical techniques, and provide weekly and monthly reports when requested.

Advance Auto Parts
Inventory Analyst
March 2015 - May 2016 (1 year 3 months)
Raleigh, North Carolina, United States

- Manage inventory levels for multiple categories across a network of 10 distribution centers and over 4,000 stores.
- Collaborate with merchant, visual merchandising, and floorplan teams to help execute new planograms and manage existing planograms in our stores nationwide.
- Configure weekly reports using custom SQL queries and Excel functions to present inventory status for multiple categories to top-level management.

Education

Virginia Tech
